

## How to Change Quantities on Variable Products

To change the quantity on a variable product, you'll need to do a *Full Edit*. See the instructions on *Quick Edit* for how to quickly spot a variable product.

Once you're editing the product, scroll down to the *Variations* tab.

**Important: Don't change the Inventory tab! This will break the variable product!**

You can click *Expand* to open up all variations or alternatively, click next to the variation name to expand an individual variation. Beware: variations may span multiple pages and you'll need to save before changing page!

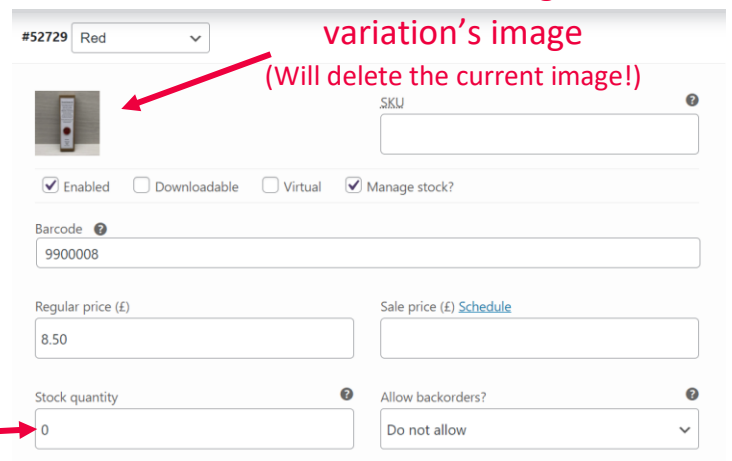

Click in this grey space to collapse or expand this variation (Currently expanded!)

You can then change stock quantities prices for each individual variation using the fields in each area.

To change the image for a variation, you can click on the thumbnail (this will delete the current image) and then you can simply select a new one.

Also, if you want to mark a product as 'a large amount in stock', you can simply untick the manage stock checkbox to say there's an unlimited volume in stock.

Stock Quantity

To effectively 'Delete' a variation, just untick the 'Enabled' checkbox, this is equivalent to making this individual variation private.

Once you've made any changes to variations, you need to scroll down and click save at the bottom of the variations list AND click save in the top right corner of the page as usual.

Save changes Cancel

19 variations (Expand / Close) << < 1 of 2 > >>

Click this save first  
(At bottom of variations list)

Then click update at the top

#### Changing the 'Group Photo'

You can also change the thumbnail that displays in the list of all products from this page. This can be done in the box on the right hand side where you would normally change the image for a simple product.
